

Managed Care Ombudsman Quarterly Report

Year 6, Quarter 4

(January 1 – March 31, 2022)

EXECUTIVE SUMMARY

The Office of the State Long-Term Care Ombudsman's Managed Care Ombudsman Program advocates to resolve managed care issues on behalf of Medicaid managed care members who receive care in a healthcare facility, assisted living program, elder group home, or who are enrolled in one of the seven home and community-based services (HCBS) waiver programs, which include: AIDS/HIV Waiver, Brain Injury Waiver, Children's Mental Health Waiver, Elderly Waiver, Health and Disability Waiver, Intellectual Disability Waiver and Physical Disability Waiver.

For this reporting quarter, the Office experienced a fluctuation of individual member cases/complaints per month, as follows: 58 in January, 54 in February and 57 in March.

The issues identified for the fourth quarter are the primary managed care member issues addressed in January, February and March, 2022. The Office works with a variety of essential stakeholders to help address and resolve issues. The Office deploys a variety of methods including encouraging use of best practices; facilitating and coordinating communication with necessary parties; and referring to outside agencies as necessary. During Quarter 4-Year 6 of Medicaid managed care, members reported the following primary issues:

1. Access to Services/Benefits Waiver members reported a lack of available providers. The lack of providers includes medical physicians, skilled care providers, transportation drivers, chore/homemaking providers and home modification providers. The lack of providers available to members had a direct impact on the members' overall health as did the wait time members experienced for service benefits to be approved. Some members did not receive all services, for which they were approved.

2. Services being reduced, denied or terminated Members needing long-term services and supports reported reductions or denials in their HCBS waiver services in their homes or assisted living programs. Many times these health services are those which were approved in the past. This often affected consumer directed attendant care (CDAC) and consumer choice options (CCO) service hours. In response to reductions in services, members are requesting more formal appeals and fair hearings to gain access to the services they feel are necessary for their health and safety.

The report that follows includes an overview of the fourth programmatic quarter of Year 6 (January, February and March, 2022), as well as an update on the program, community partnerships, outreach efforts and administrative activities.

MANAGED CARE OMBUDSMAN PROGRAM TRENDS

In addition to tracking member issues on a monthly basis, the Managed Care Ombudsman Program documents and tracks trends discussed by members. Issues and trends identified this quarter included:

1. Transition services/coverage gap, inadequate or inaccessible. Medicaid members report lengthy wait times when needing to transition to a new residence and/or a new Medicaid program. While members wait for assistance with transitioning they live in inadequate conditions as a result of lack of care planning, disruption in the continuity of care and other cascading issues are caused by inaccessibility. The transitional gap of services renders the member most vulnerable during these times when the member does not receive the care they need, thus placing them at risk. This is an ongoing systemic issue.

2. CDAC and CCO Impacts. Consumer Directed Attendant Care (CDAC) and Consumer Choice Options(CCO), are choices available to Medicaid members who are eligible for one of the home and community-based services (HCBS) waiver programs and is a service frequently used by HCBS waiver members. The Managed Care Ombudsman Program continues to receive a high number of complaints from members reporting dissatisfaction with changes affecting their CDAC services. Changes include service reductions or denials, and also changes that impact the day to day use of CDAC services. Members were also concerned over their CDAC provider not receiving payment on time. Members have reported a lack of approved CDAC providers for members living in remote rural areas, this issue was more prevalent. Some members have lost their providers due to the provider not being paid for services rendered.

3. Case Management. Case management issues are ongoing with poor communication from their case managers. Members also share they have experienced a lack of needed services. This is due to their misunderstanding of what case managers' obligations are, when it comes to approving necessary services.

COMMUNITY PARTNERSHIPS AND OUTREACH

Advocacy is more than complaint resolution or assistance with filing a grievance, appeal or fair hearing. It includes providing education, information, consultation, technical assistance or making a referral to the appropriate entity to ensure members have the information needed to make informed decisions regarding their care, in addition to partnering with community stakeholders to connect members to resources beyond the Managed Care Ombudsman's scope.

The Managed Care Ombudsman Program networks with other advocacy and provider groups, associations, organizations and agencies to coordinate the provision of assistance to members. The Managed Care Ombudsman Program also participates, when possible, in various forums and work groups on a regular basis to inform and discuss and to address collective concerns expressed.

The Managed Care Ombudsman attends the Medicaid Assistance Advisory Council meeting and continues to attend the Olmstead Taskforce meetings.

Additionally, the Managed Care Ombudsman Program maintains a website with information regarding the program's services, informational materials and links to other resources. Electronic versions of communications materials and tools can be found at
